

Take a **deep breath...**

ambius

Now exhale slowly. Take another... and exhale slowly. In the world outside, nature is doing the same thing, breathing in your carbon-dioxide and exhaling pure oxygen in a life cycle we all depend on. Throughout the ages, our lives have been linked with nature. The psychological effects of this relationship run deep within our psyche. Good interior plantscaping design in office environments can help provide a “green zone” which effectively helps to connect workers with nature indoors.

*And at **Ambius** we offer another connection...a special all Australian rainforest plants range. And that’s not all... by choosing plants from this range, you will be helping to protect our unique Australian rainforests.*

*How? By choosing any of these plants as part of your **Ambius** rental, a contribution will go to **Rainforest Rescue** to help **protect rainforests forever** in Australia’s unique Daintree area in North Queensland. This will help create wildlife corridors for our unique fauna. Want to know more? Call **1300 AMBIUS (1300 262487)**.*
